

To Whom it May Concern:

Air 1 has served my listening needs for the past three years in the St. Cloud, MN Area. I drive alot for my work and I have over an hour a day where my dial is tuned to 89.5 out of St. Cloud, MN. I think over the past five years, Christianiaty has actually become "Cool" for kids of all ages. I know when I was a kid growing up, I never really had any sort of music that combined my Christian values with my musical tastes. All that really existed in the realm of Christian music was Worship and a few random groups that never really found the airwaves. Now there are literally hundreds of Christian Groups that sing everything from pop to hip hop to rock to rap to country and on and on. Air One provides people in the area an opportunity to hear all of the new music that people love. These stations are all funded through the giving of the public, so you know there is a demand for the station. I would hope that these stations would be allowed to continue.

**Thank You and God Bless,
Chris Costello**
